PROFESSIONAL SUMMARY

Software Engineer graduated from UniEvangélica, with experience in *full-stack* development (Node.js, TypeScript, PostgreSQL, and React), process automation, and data organization and analysis. Practical experience in database modeling, *back-end* integration, responsive web interfaces, and standardization of workflows using spreadsheets and digital tools, applying agile methodologies and development best practices.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, C++, C#
Back-end	Node.js, database integration, route and API development
Front-end	React, HTML5, CSS3, JavaScript, responsive interfaces, UI/UX
Databases	PostgreSQL, MySQL, data modeling
Design	Adobe Photoshop, Illustrator, InDesign
Productivity	Excel, Word, PowerPoint, structured spreadsheets, and data validation
Methodologies	Agile methodologies, project management

PROFESSIONAL EXPERIENCE

Administrative Assistance Advisor 2024 – Present
Goianápolis City Hall (Prefeitura Municipal de Goianápolis) — Goianápolis – GO, Brazil

- Automated and optimized internal processes using structured spreadsheets, data validation, and standardized administrative routines.
- Responsible for digital travel control and for supporting decision-making.
- Tracked requests and internal processes end to end, ensuring organization, clarity, and traceability of information.

Back-end Developer Intern 2022
Fasters Soluções em Tecnologias

- Modeled and managed data with PostgreSQL, including creating and maintaining database structures.
- Integrated the database with a TypeScript *back-end*, ensuring efficient communication aligned with the application's needs.

Front-end Developer Trainee 2021 – 2022
Fábrica de Tecnologias Turing — Anápolis – GO, Brazil

- Contributed features and improvements to Unisecurity, the internal system of the university's software factory.
- Built responsive web interfaces following *front-end* best practices.
- Optimized usability and performance, focusing on user experience and technical efficiency.

PROJECTS

- **Woodworking company institutional website** (landing page, design system, and UI design) — helloale.github.io/arqmov HTML, CSS, JavaScript, and React, focused on responsiveness, usability, and reusable components.
- **Agricultural company website** — developed and integrated the database, creating routes, connections, and structures for efficient data storage and querying.
- **Landing pages and web interfaces** — modern pages optimized for different devices. Portfolio: helloale.github.io/portfolio.

EDUCATION

Bachelor's Degree in Software Engineering 2021 – 2025
UniEvangélica — Anápolis – GO, Brazil
